Additional Performance Credit Calculations and Supplemental Information

Describe below the progress made in meeting your program year work plan inspection goals. You must provide quantitative results for each compliance inspection and land application goal listed in your work plan.

Strategies and goals set up in work plan are followed when ever possible. Har to follow inspection strategy for new construction sites, or expansions of sites, when no one actually does either. I have spent hours with potential producers, who wanted information on what they needed, looking at possible sites to build, review setbacks, etc. and then they don't build, or they become State permits. Inspections of current site as far as the strategy set up, these have been met. We continue to work on the five year rotation of sites. Seven of the sites would fall under the five year rotation. I also targeted 5 sites for record keeping issues, which amounted to keeping better records then what they were currently doing. One site was one which had never been inspected. Three sites had gone through change of ownership, which inspection time included updating the County files. County always follows work plan for the issuing of letters of receipt of registration and the required registration of all feedlots. We work on re-registering all feedlots every four years. We acheived 100% response. Much time was consumed by this activity as well as entry into TEMPO. Also, have been assisting a feedlot owner with issues concerning manure application and working with the CAWT to keep him in compliance. I believe as a county we follow the workp[lan to the best of our ability. The lack of feedlot growth in our County doesn't mean we don't have any work to do.
