Sam Muntean PE  
Highway Engineer

March 24, 2025

Dear Dust Control Recipients,

The Lac qui Parle County Highway Department will be applying dust control on county, township and community gravel roads in Lac qui Parle County as approved by the County Highway Engineer. Only liquid calcium chloride will be offered as dust control treatment.

Residents living on county and township gravel roads or Local Units of Government with gravel roads, within Lac qui Parle County, who wish to have the dust control, must submit the attached form to the County Highway Engineer, Lac qui Parle County Highway Department, 422 5<sup>th</sup> Avenue, Suite 301, Madison, MN 56256 by **April 18, 2025. No request will be accepted after this date.**

The cost of material and application will be \$1.18 per running foot for those living on county roads, and 59 cents per running foot per pass for those living on township roads. This is based on 0.25 gallons of material per square yard. The gravel roads should be bladed prior to application; this must be arranged between the resident on township roads and the Township Board. **Lac qui Parle County makes no guarantee of the performance of this product**, and the placement of the dust control will be when the County maintained roadways are ready for the application which is anticipated in mid-May to early-June of 2025.

In order to have your dust control applied, the County asks you to place a county provided, white painted lath, at the beginning and the end of the desired location for the dust control. **If there are no lath placed at the time of application, the operator will not apply dust control in your location.** Once the dust Control has been applied we ask you to please remove the lath from the road right-of-way.

Lath will be available at the Highway Department Shop

308 6<sup>th</sup> Street South  
Madison, MN 56256

If you have any questions, please give me a call at (320) 598-3878.

Sincerely,

Sam Muntean  
County Highway Engineer
